

## Lot Number Code

Each lot of sodium bicarbonate produced by Natrium Products, Inc. is identified by 5 digits representing the date of the first Monday of the one-week period in which the product was packed (the "lot-week"), followed by one letter representing the product storage bin. This lot number format is as follows:

**mmddyX**, where

**mm** = 2-digit month in which the first Monday of the lot-week occurred

**dd** = 2-digit day representing the first Monday of the lot-week

**y** = last digit of the year in which the first Monday of the lot-week occurred

**X** = bin identifier (A, B, C, L, or M)

Example: 03165A = March 16, 2015 from bin "A"

March 16, 2015
