Re: Natrium Products Inc. Sodium Bicarbonate

To whom it may concern:

This is to certify that all grades of Natrium Sodium Bicarbonate consist only of sodium bicarbonate (CAS Reg. No. 144-55-8). None of the following substances are used in our production of sodium bicarbonate, and based on our knowledge of our raw materials and manufacturing process, we do not expect any residues of these substances to be present in our products:

Phthalates, Polyvinyl Chloride (PVC), Bisphenol A (BPA) or any other synthetic polymer, plasticizer or additive used in plastic material manufacturing;

Known or suspected carcinogens or reproductive toxins, including those listed under the state of California Proposition 65 State Drinking Water and Toxic Enforcement Act;

Any of the substances on the Candidate List of Substances of Very High Concern published in accordance with Article 59(10) of the REACH Regulation (last updated on 1/17/2022).

Nanoparticles, according to the definition in 2011/696/EU which defines nanoparticles as a material where, for 50 % or more of the particles in the number size distribution, one or more external dimensions is in the size range 1 nm - 100 nm.
